Photo Tin Star

Materials:

- Tin Star
- Photographs with images small enough to fit on the surface of your star
- Patterned Scrapbook Paper
- Mod Podge

Tools: Paper Trimmer, Ruler, Pencil and Scissors

Directions:

-Measure one point (arm) of the star and subtract 1/4" from each length.

-Trace the dimensions on to the backside of your patterned paper.

-Hint: it may help to take a piece of cardstock or cardboard to make a template of one side of the star to use when cutting your paper and photos.

-Cut your paper and photos to fit the sides of your star .

-Design idea: take your template and cut in half to allow for more options for photos and patterns.

Decoupage your photos and paper to your tin star, following the directions on the Mod Podge label.
